FOR IMMEDIATE RELEASE

CSX LAUNCHES NEW ONLINE APPLICATION TO SUPPORT LOCAL BUSINESSES IN SOUTHEAST WASHINGTON, D.C.

Washington, D.C. – September 29, 2015 – CSX is investing in a new mobile-friendly web app, The Neighborhood Guide, to support local businesses in Southeast Washington, D.C., where CSX is replacing the Virginia Avenue Tunnel. The geolocation-enabled app lists nearby shops and recreational areas, provides special promotions from local merchants, and identifies convenient places to park. The Neighborhood Guide was developed to encourage project team members and construction personnel to support area businesses during the project.

In collaboration with Barracks Row and the Capitol Riverfront Business Improvement District, CSX created the app to promote area businesses to the hundreds of construction personnel and project staff who will be working in the neighborhood during the 30-42 month tunnel-reconstruction project. CSX partnered with Barracks Row Main Street and the Capitol Riverfront Business Improvement District to ensure that all local businesses are represented.

“We’re proud to be part of the Virginia Avenue neighborhood of southeast Washington, D.C.,” said Chuck Gullakson, CSX assistant vice president and chief project engineer for tunnel project. “We developed this online application to encourage people, especially those commuting to the area to work on the project, to support nearby businesses while they’re here. We hope this app is equally useful for neighborhood residents and other visitors who may be looking for new neighborhood restaurants and entertainment activities to try.”

The Neighborhood Guide organizes area businesses into six categories: Dining, Lodging, Parking, Attractions, Shopping or Services. Users can also save their favorites for easy access. To access the app, please visit theneighborhoodguide.com.

The Virginia Avenue Tunnel in southeast Washington, D.C., is a crucial element in the East Coast's rail transportation network. The tunnel allows freight trains to move among key U.S. consumer and industrial markets and the ports that connect them to the global economy. CSX is replacing the 110-year-old tunnel with a modern, two-track structure that eliminates a bottleneck in the D.C. region's rail network while facilitating the transport of double-stacked containerized freight. To learn more about CSX's Virginia Avenue Tunnel Reconstruction Project, please visit virginiaavenuetunnel.com.

About CSX

CSX, based in Jacksonville, Florida, is a premier transportation company. It provides rail, intermodal and rail-to-truck transload services and solutions to customers across a broad array of markets, including energy, industrial, construction, agricultural, and consumer products. For nearly 190 years, CSX has played a critical role in the nation's economic expansion and industrial development. Its network connects every major metropolitan area in the eastern United States, where nearly two-thirds of the nation's population resides. It also links more than 240 short-line railroads and more than 70 ocean, river and lake ports with major population centers and farming towns alike. More information about CSX Corporation and its subsidiaries is available at www.csx.com. Like us on Facebook (<http://facebook.com/OfficialCSX>) and follow us on Twitter (<http://twitter.com/CSX>).
